Document type:	Policy
Number of pages:	6 (including front sheet)
Author / Contact:	Chair of Matrons' Forum

Northern Lincolnshire and Goole Hospitals NHS Foundation Trust actively seeks to promote equality of opportunity and good race relations.

The Trust seeks to ensure that no employee, service user, or member of the public is unlawfully discriminated against for any reason, including their religion, beliefs, race, colour, gender, marital status, disability, sexual orientation, age, social and economic status or national origin.

These principles will be expected to be upheld by all who act on behalf of the Trust, with respect to all aspects of this document.

1. Purpose

North Lincolnshire & Goole Hospitals NHS Foundation Trust cares for many vulnerable people and must take measures to control the environment in which that care is delivered. The Trust is committed to working to meet the needs of patients and their visitors whilst also promoting safety, privacy and dignity, and infection control.

This policy is supported by a visitor information leaflet which will be made available in all areas. This provides patients and their visitors with additional information which they may need to ensure that they understand why adherence to the policy is important.

2. Consultation

This policy has been widely circulated throughout all Clinical Divisions. Consideration has been given to the comments received from the Patient Visiting Questionnaire carried out in 2006. Input has been sought from Divisional Clinical Governance Groups, the Matron's Forum and via the Trust Intranet Document Consultation page.

3. Duties

3.1 It will be the responsibility of the Matrons to ensure the successful implementation of this policy, with the support of Divisional Teams.

Staff with responsibility for the application of this policy are:

3.2 All Nursing and Midwifery Staff

3.3 All ward-based Patient Administration Staff

4. Area

This policy will apply to **all areas** of the Trust, across all sites **except** the following specialised areas;

- Coronary Care Units
- Medical Admissions Units
- Intensive Care Units
- Children's Wards
- Neonatal Intensive Care Units

This is due to the specific needs of the patients in these areas.

5. Actions

5.1. Patient Care Interventions

In recognition of the greater restrictions placed upon visitors, the Ward Manager / Nurse or Midwife in Charge will ensure that, wherever possible, clinical interventions will be minimised during visiting hours.

5.2. Circumstances requiring special consideration

The Ward Manager / Nurse or Midwife in Charge of each clinical area is responsible for the implementation of this policy, and may make exceptional allowances in the following situations:

- i) Where the patient is receiving palliative care and / or when specific support and care is required, for example for patients with Learning Disabilities, patients known to be dying, and when carers provide a significant amount of care to the patient.
- ii) In other individual, exceptional and specific circumstances, to meet special needs of a patient. Examples may include circumstances where a patient is particularly vulnerable and for visitors to avoid prolonged travelling, or in response to public transport issues.

5.3 Guiding principals of this policy

To ensure that this policy is adhered to the Trust will:-

- support the Ward Manager / Nurse or Midwife in Charge as the gatekeepers of this policy;
- provide exception guidance to support specific patient needs.

In order to provide a safe, clean and comforting environment, visitors are asked to respect the following rules.

5.4 Agreed Visiting Times

Afternoon Visiting will be between 2pm and 4 pm.

Evening Visiting will be between 6.30pm and 8 pm.

5.5 VISITOR CODE

In circumstances where visits outside of normal visiting times are considered to be in the patients' best interest and not detrimental to the care of others, special permission may be granted by the Ward Manager / Nurse or Midwife in Charge and recorded in the patient care plan.

All visitors are asked to help the hospital staff to help those in our care by adhering to the following simple rules:

- Please observe the visiting times indicated for each ward.

- Adhere to the maximum numbers of visitors allowed. This is 2 visitors at the bedside at any time, unless special permission is granted by the Ward Manager / Nurse or Midwife in Charge.
- Please note that if a clinical procedure needs to be undertaken in a ward area you may be asked to leave the ward temporarily. The clinical procedure may not be affecting the patient you are visiting, but may be in the same bay.
- Do not visit if you are unwell:-
 - Visitors should be free of any symptoms of vomiting and diarrhoea for 72 hours before coming to the ward.
 - With reference to coughs and colds and other infections you should be symptom free before coming to the wards.
- Use the hand rub provided as you enter and leave the ward.
- When visiting a ward that is closed due to an outbreak, soap and water hand wash should be used.
- Wash and dry your hands after visiting the toilet.
- Do not sit on the bed or use the patients' toilets. Only use toilets designated for visitors.
- Do not share your relative's toiletries, tissues etc. or items of hospital equipment with other patients, unless it has been approved by a member of the nursing team.
- Do not visit wearing a uniform worn in other health care settings, e.g. nursing / residential care homes.
- Do not touch your relatives' or friends' wound, or any devices such as drips or catheters.
- When visiting patients who are being nursed in Isolation Rooms, check with the Nurse/Midwife in charge about any precautions that need to be taken.
- Talk to the Nurse or Midwife in Charge, or ask to see the Matron if you have any concerns about the cleanliness of the hospital environment.

5.6 Children

Patients' children / grandchildren may visit following discussion with the Ward Manager / Nurse or Midwife in Charge and subject to the following conditions:

- that they are supervised by a responsible adult at all times, acknowledging that they will, politely, be asked to leave if they roam the ward or disturb other patients;
- that they follow the above criteria for visiting e.g. use of hand rub, not sitting on beds etc.,

- that the patient / parent accepts that there may be times, due to unforeseen ward activity, that visiting by children may be not be allowed e.g. during emergencies.
- In some circumstances, visiting may be possible outside of the ward environment. Please discuss this with the Ward Manager / Nurse or Midwife in Charge.
- Please do not change baby's nappies on the wards. Nappy changing facilities are available in visitors toilets

5.7 Zero Tolerance – Violent, Threatening and Abusive Behaviour

The Trust and its staff are committed to providing high quality care to patients and giving consideration to the needs of their visitors. However, all patients and visitors are advised that the following inappropriate behaviour will not be tolerated:

- Swearing
- Threatening / Abusive Behaviour
- Verbal / Physical Abuse

The Trust reserves the right to withdraw visiting rights from patients who are threatening / abusive / violent and will ensure the removal of those persons from the premises.

All acts of criminal violence and aggression will be notified to the Police immediately.

6. Monitoring Compliance and Effectiveness

To ensure compliance at Ward level, Matrons will receive feedback on the application of the policy from Ward Managers. This will include the effect on patients, and on the ability of visitors to comply with Infection Control Policies and Procedures.

A measure of the effectiveness of this policy will be a review of the number of PALS concerns and Formal Complaints made to the Trust in relation to visiting arrangements, or arising from the implementation of this policy, to be reported to the Matrons Forum each quarter. The views of patients as reflected in their responses to questionnaires, inpatient surveys etc. will be considered.

This policy will be reviewed by the Matrons Forum 12 months after initial implementation, and on a regular basis thereafter in light of the needs of the Trust.

7. Dissemination

This document will be readily available throughout the Trust via the intranet site, and will be brought to the attention of all Ward Managers and their staff through their Matron. The policy and the Visitor Code will be more widely publicised via the Trust Internet site, and, on occasions, through the local Press.
