Information for patients and visitors

What happens at the Cardiology Clinic?

Outpatients Department
Central Operations Group

This leaflet has been designed to give you important information about your condition / procedure, and to answer some common queries that you may have.
Introduction
Cardiology is the study of heart conditions. The Consultant with whom you have an appointment is a specialist in this area of medicine.

What do I need to bring with me to the clinic?
You need to bring the following:
- Appointment letter or card
- A list of current medications
- Your diary or a list of dates when you will not be available so that suitable times can be booked for tests, treatment or follow-up clinic appointments

You are welcome to bring a friend or relative with you. They can stay with you for the duration of your visit in most cases. However, to respect your privacy they may be asked to wait outside if you are being examined or whilst tests are being carried out.

If traveling by car please be advised that you need to allow approximately 20 minutes for parking as spaces are limited.

How do I make my next appointment?
The Doctor may require you to return to the hospital for monitoring or for the results of tests. At the end of your consultation, you will be given a form to take back to the receptionist. If a follow up appointment is required within the next 6 weeks the receptionist will agree a suitable appointment with you. If the appointment is required after 6 weeks you will be contacted closer to the time to arrange an appointment.

To whom do I direct any enquiries?
For queries about your appointment, to cancel or change your appointment please ring the Contact Centre (refer to your appointment letter for the telephone number).

The Consultant and nursing staff will be pleased to answer any queries you have about your condition or care at the time of your appointment.

If you need to discuss your referral or have queries about your condition which arise before or between appointments your GP should be able to help. He will receive a letter informing him of the outcome of your consultation. If you require a copy of any correspondence, please inform us on the day of your appointment.

Where do I report to on arrival?
On arrival, please report to the reception indicated on your appointment letter. The receptionist will check that all your details held on computer, including your name, address and contact numbers are up to date and correct. You may also be asked for additional information which we are obliged to collect and will help us provide a better service.

You will then be directed to the appropriate waiting area.

What will happen when I arrive in clinic?
You will be greeted by a member of nursing staff who will measure your weight and height in order to calculate your body mass (BMI). At this stage, you may be asked to go for one of the following tests:
Information for patients and visitors

- **Echocardiogram (ECG)** - this is a tracing of the heart carried out by attaching leads
- **Echocardiograph (ECHO)** - a scan of the heart. Both tests are simple and painless. Once the tests have been completed, you will be given the results in an envelope and asked to return to the clinic and hand them to the nurse. She will then ask you to take a seat in the waiting area until the doctor is available to see you.

**How long will I have to wait?**
We endeavor to see all patients within 30 minutes of their appointment time. If you are waiting longer than this, please inform the nurse in clinic who will explain the reason for the delay.

Please do not worry if patients attending after you appear to be seeing the Doctor before you. There will be more than one Doctor working in the clinic all seeing patients from different lists. All patients are seen in strict order of appointment, but if you have any doubts or worries please ask the nursing staff.

**Which doctor will I see?**
You will see either the Consultant to whom you have been referred or a member of their team.

**Will there be anyone else present?**
There will be a clinic nurse present who will provide any help or support you might need.

There may also be medical or nursing students present in the clinic. This is a valuable part of their training. If you would prefer them to leave during your consultation, please inform the clinic nurse.

**What will happen during my consultation?**
The Consultant will ask you questions about your general health and symptoms you are having. He / she will want to know about any medication you are currently taking so please bring them or a list with you. He / she will make a full assessment of your condition and explain appropriate treatment options.

**Will I be examined?**
To aid diagnosis and help the Consultant to make a decision about appropriate treatment an examination will be necessary.

**Will I need to undress?**
You will be asked to remove or loosen relevant articles of clothing. Your privacy and dignity will be respected at all times.

**Will I require any further investigations?**
Common investigations include:

- Blood tests which can be carried out at the Pathology Department before you leave
- X-rays which can usually be carried out on the day of your appointment
- Stress test which is carried out in the Cardiology Department and measures the hearts response to controlled exercise

If additional tests and examinations are required, where possible, they will be arranged and confirmed with you before you leave the clinic.
Will I require treatment?
Any suggested treatment and options will be explained fully during your consultation in order for you to make an informed decision.
If you require medication, you will be given a letter to take to your GP who will prescribe the appropriate medication. If your Consultant wants you to start the medication immediately, you will be given a prescription to take to the hospital pharmacy who will dispense it before you leave.

How long will I be in the clinic?
Because there is the possibility that you will be able to have some tests carried out on the same day please allow an hour and a half for your Outpatient visit.

For Scunthorpe General Hospital
Alternatively you can contact the Patient Advice and Liaison Service (PALS) on (01724) 290132 or at the PALS office which situated on C Floor.
Alternatively you can email: nlg-tr.PALS@nhs.net

Confidentiality
Information on NHS patients is collected in a variety of ways and for a variety of reasons (e.g. providing care and treatment, managing and planning the NHS, training and educating staff, research etc.).
Everyone working for the NHS has a legal duty to keep information about you confidential. Information will only ever be shared with people who have a genuine need for it (e.g. your GP or other professionals from whom you have been receiving care) or if the law requires it, for example, to notify a birth.
Please be assured however that anyone who receives information from us is also under a legal duty to keep it confidential.

Zero Tolerance - Violent, Threatening and Abusive Behaviour
The Trust and its staff are committed to providing high quality care to patients within the department. However, we wish to advise all patients / visitors that the following inappropriate behaviour will not be tolerated:
- Swearing
- Threatening / abusive behaviour
- Verbal / physical abuse
The Trust reserves the right to withdraw from treating patients whom are threatening / abusive / violent and ensuring the removal of those persons from the premises.
All acts of criminal violence and aggression will be notified to the Police immediately.

Risk Management Strategy
The Trust welcomes comments and suggestions from patients and visitors that could help to reduce risk.
Perhaps you have experienced something whilst in hospital, whilst attending as an outpatient or as a visitor and you felt at risk. Please tell a member of staff on the ward or in the department you are attending / visiting.

Moving & Handling
The Trust operates a Minimal Lifting Policy, which in essence means patients are only ever lifted by nursing staff in an emergency situation.

Patients are always encouraged to help themselves as much as possible when mobilising, and if unable to do so, equipment may be used to assist in their safe transfer.

If you have any questions regarding moving and handling of patients within the Trust, please speak to a member of staff in the ward or department you are visiting.
