Information for patients

Who is the service for?

Our NHS Early Years' Service is for children aged 3 to 5 years who have Speech, Language and Communication Needs or a feeding and swallowing difficulty. Children can be referred to our NHS service by a parent, Health Visitor, GP, consultant, nursery or school. If you are unsure about referring you can contact us to talk about your concerns before making a referral. Further guidance about making a referral is available at the end of this leaflet – Appendix One.

*Children with cleft palate or feeding and swallowing concerns are seen at any age (0+ years).

*Children aged 2 years should have received a Speech and Language Measure assessment as part of their two year check with their Health Visitor or Family First Practitioner and referred to our Family Hub service.

Please note we are only commissioned to see children who are registered with a North East Lincolnshire GP. Children who live or attend school outside of our area, but who have a North East Lincolnshire GP, will be offered clinic based appointments.

What to expect:

We offer all children an initial assessment with a registered Speech and Language Therapist within four weeks of referral. Following that initial assessment we will work with you to agree a plan of care for your child. We will provide a written care plan to home and a copy, if required, for nursery / school. We provide early intervention following best practice guidelines. Your child will be discharged if they do not currently require speech and language therapy intervention, please see below.

Children and Families may Require Speech and Language Therapy if:

1. They are not meeting speech and language milestones for their age / developmental level
2. They are stammering
3. They have no means of communication
4. They have limited / no interaction with other children and / or adults
5. They have difficulties with eating and drinking
6. There are signs of 'Selective Mutism' e.g. not talking at school or nursery after 6 months of attending

You don't need to be Seen by a Speech and Language Therapist if:

1. Your child is learning English as an additional language and your child is developing normally in their first language
2. Your child's difficulties are due to limited attention and listening skills or behaviour difficulties
3. If your child has a known condition or syndrome e.g. Downs Syndrome, Autism, but does not have specific speech and language difficulties

Information for patients

4. If your child has limited food preferences

Children with an Education and Health Care Plan

If your child has specific speech and language targets on their Education and Health care plan we will provide intervention for your child in their Educational setting. We provide updated information for the Local Authority as part of the Education and Health Care plan process.

For further information about Education and Health Care plans in North East Lincolnshire please follow the web link. <https://www.nelincs.gov.uk/children-and-families/send-and-local-offer/education-health-care-plan/>

What will happen next?

If speech and language therapy intervention is required you and your child will be offered therapy sessions, either with a Speech and Language Therapist or a Speech and Language Therapy Assistant. These sessions usually take place in clinic. This may involve:

- A one off demonstration session to deliver a pack of work for you or the school / nursery to carry out
- A workbook for home or school / nursery
- Weekly / fortnightly speech therapy sessions with you and your child. This will be for a set period of time with specific targets. This may be offered as individual or group sessions

Your child will be discharged from our service when:

- Your child's speech and language skills are following normal developmental patterns or are within the normal range for their age
- Your child's speech and language skills are in line with their general development and learning
- Speech and language is not your child's current primary need e.g. if the referral is relating to behaviour, social communication, attention and listening
- Advice and support have been given and you can continue with strategies and activities at home and / or school. We will advise you to refer your child again if they need further intervention
- Support strategies are already in place and there is no current evidence about how this is being implemented
- Your child does not yet have sufficient attention or self-awareness/motivation for therapy at this time
- Functional communication has been achieved
- You do not bring your child for their appointments

Information for patients

Please note: We do not offer a service for children with hearing impairment, where hearing is not aided to normal hearing thresholds.

Contact Number

Children's Speech and Language Therapy can be contacted on telephone 03033 303758.

Information for patients

Appendix One

Referral guidance for Early Years children with speech, language and communication needs (SLCN) 0-5 years. * Referrals for children aged 3-5 years can be completed by parents / carers or professionals

A parent or Early Years professional (e.g. Health Visitor, Early Years Practitioner) identifies a concern about a child's speech, language and communication development or an eating or drinking concern. This concern is discussed with parents. Useful tools include: Progress checker
<http://www.talkingpoint.org.uk/progress-checker>

If the child is attending an Early Years setting then please implement support strategies. Please find useful links for parents and Early Years Professionals below:
